EDUCATION

Swinburne University of Technology, Hawthorn —
Bachelor of Computer Science (Data Science Major)

2023 - 2025

Key Units: Data Science Principles, Business Intelligence and Data Visualisation, Computing Technology Project A & B, Industry Project.

PROJECTS

Melbourne Rental Intelligence — [Live Demo](#) | [GitHub Repo](#) | [LinkedIn Post](#)

MAY 2026

Built end-to-end data analytics pipeline: ETL (Python/Pandas) → PostgreSQL → FastAPI → interactive visualisation.

- Extracted and cleaned Victorian Government rental data; transformed raw CSVs into queryable format.
- Built interactive map view, dynamic charts, suburb search/filtering.
- Identified that South Eastern Melbourne is 45% cheaper than Inner Melbourne for 3-bedroom houses, saving renters \$23,676/year.

Algorithmic Trading Tool — [Technical Case Study](#)

MAR 2025 - NOV 2025

End-to-end delivery of a trading tool using Python and MongoDB. Assigned as Team Lead. Optimised database queries for real-time retrieval. Used Flask, Pandas, NumPy..

Website for Katrina Wurm — [Live Site](#) | [Case Study](#)

JUN 2025 - AUG 2025

Custom website for internationally recognised life coach and best-selling author Katrina Wurm. Built responsive UI/UX that increased engagement for a global brand.
