PROFILE

I'm Ethan, a detail-oriented Software Engineer and Data Visualisation Specialist with a strong technical foundation in Python, SQL, and Power BI. Throughout my degree I have delivered high-impact solutions, including a commercially deployed platform for an internationally recognised client and a sophisticated algorithmic trading tool as a capstone. My passion is to build high-performance applications integrating software engineering and data analytics.

EDUCATION

Swinburne University of Technology, Hawthorn — *Bachelor of Computer Science (Data Science Major)*

FEB 2023 - NOV 2025

Key Units: Computing Technology Project A & B, Industry Project, Object Orientated Programming, Business Intelligence and Data Visualisation

Overnewton Anglican Community College, Keilor — *Completed Year 12, Graduated with VCE*

APR 2013 - NOV 2022

Key Subjects: Software Development, Data Analytics

PROJECTS

Algorithmic Trading Tool — EthanLy1.github.io/projects/algotrade

Managed the end-to-end delivery of a full-stack algorithmic trading tool, utilising Python for backend logic and MongoDB for high-volume financial data storage. Assigned as Team Lead. Optimised database queries for real-time retrieval of high-volume financial datasets. Used libraries including flask, pandas, numpy, etc.

Rebranded/modernised website for Katrina Wurm — katrinawurm.com.au

Created and deployed a custom website for client Katrina Wurm, an Internationally recognised Life Coach, Efficiency and Organisational Expert,
